

LARGE DIAMETER  
ADJUSTABLE I.D. or O.D.

**Model 4300 Series**  
Gaging Depth 0—2"

**Model 4500 Series**  
Gaging Depth 0—5"

**4300 Gage**

Similar to the straight frame series 4000 but with additional capability for adjustment to any dimension within its 6" range. (see chart for ranges).

The model 4300 has a 0—2" gaging depth and allows use of any of the interchangeable contact points. It is furnished with a .0005" graduated indicator.

The 4300 gage uses the 5300 Setmaster as its counterpart reference master—available in the same range dimensions.

**4500 Gage**

A modified straight frame gage with great reliability and increased depth range. Models come with adjustment ability within their 6" range capacity. The unique feature being the adjustable depth gaging permitted through the extension of the rest dowels.

Equipped with the standard three point rest dowel system, and uniform in acceptance of any of the aforementioned gaging contacts. Dial Indicator supplied is graduated .0005" with 360° rotation.

The 4500 Gage uses the 5500 Setmaster as its reference counterpart—available in the same range dimensions.
